# Bikash Panda

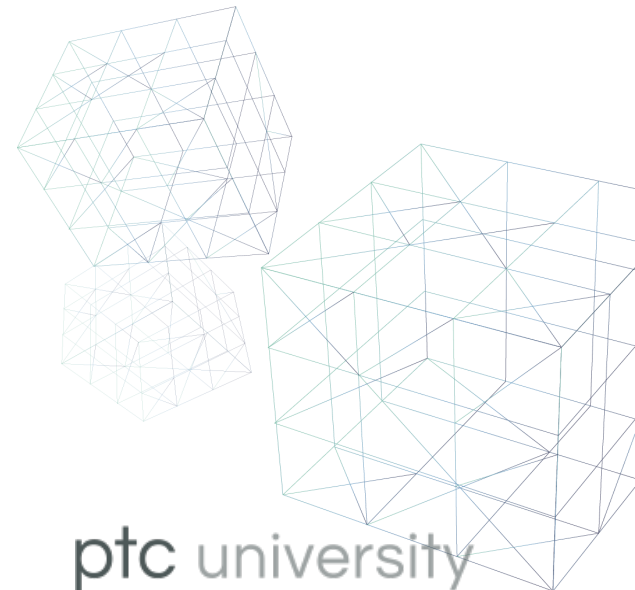

has successfully completed

## ThingWorx Foundations

a comprehensive ThingWorx developer online curriculum

A handwritten signature in black ink, appearing to read "Ayora Berry", with a horizontal line underneath.

Dr. Ayora Berry  
VP, PTC University

ptc university

# IoT Skills Learned in ThingWorx Foundations

## Fundamentals of IoT Development with ThingWorx

- IoT use case development
- Data architecture strategy
- Implement architecture for managing IoT devices and systems
- Agents, clients and edge communication fundamentals
- REST API connectivity
- Basic application UI development with Mashups

## IoT Modeling with ThingWorx

- User-centered solution design
- Permissions, organizations, and user groups fundamentals
- Modeling patterns and strategies
- Data structures
- Events and subscriptions
- Wrapped JavaScript services

## IoT UI Development with ThingWorx

- User interface low fidelity prototyping
- Application UI design principles
- Static and Responsive design fundamentals
- Dynamically pull data into applications
- UI feedback and error prevention methods
- Assign users and roles to applications
